— ERIE COUNTY FOREST MGT PLAN

PROJECT DESCRIPTION:

CC Environment & Planning is currently updating the Erie County Forest Management Plan (FMP) for 12 Forestry Lots encompassing 2,923 acres in the towns of Concord, Holland, and Sardinia. The planning process includes a dynamic public and stakeholder engagement strategy designed to incorporate local knowledge and priorities and will help focus multiuse elements of the FMP.

We are conducting thorough desktop environmental data gathering and analysis to guide efficient ecological and forestry data collection. Upon completion of field data collection, desktop analysis and interpretation will be performed to develop recommendations at the ecological community and forest stand level. The updated FMP will balance the multiuse potential of the forest lots to best serve the public these lands are meant to benefit. The FMP will include forest restoration plans, silvicultural prescriptions, and a 10-year implementation plan while incorporating preservation, ecological restoration opportunities, public access, recreation, education, and non-timber forest products.

SERVICES PROVIDED:

-  Forest Management Planning
-  Forest Resiliency Planning
-  Public Engagement
-  Ecological Assessment & Inventory
-  Habitat Protection and Restoration
